

Creating the ideal environment for your business

Whether its people, animals or sensitive equipment, materials and goods, quality air at the right temperature is a matter of control, not chance.

HVAC (Heating, Ventilation & Air Conditioning) systems give you the control you need over your premises ambient environment – temperature, humidity, air flow, and air filtering. Experts in HVAC and critical building systems, **Air Dynamics** have the tested and proven expertise to help you ensure your premises operates at the optimum environment for your business.

Innovative, efficient and effective

From general engineering and fabrication work to full design, installation and maintenance of HVAC systems.

We are your critical systems experts

For more than 20 years, **Air Dynamics** has enjoyed a well-warranted reputation for responsive, reliable service, and quality, precision workmanship across all aspects of Heating, Ventilation and Air Conditioning (HVAC) and sheet metal fabrication.

From our Palmerston North base, our experienced skilled team of 16 undertake projects around the lower North Island. Our expertise extends from scoping, design, fabrication and installation across facilities as broad ranging as hospitals, medical centres, retirement homes, supermarkets, correctional facilities, mail centres, laboratories, sports complexes, banks, military and aviation facilities.

Whether projects are small or large; whether one-off general engineering and fabrication or full design-to-install HVAC, **Air Dynamics** has the proven expertise and experience to deliver the right solution for your premises.

Full service support

With a highly skilled in-house team of designers, project managers and tradesmen, we can complete your job from start to finish. Or we can simply take care of one aspect. We'll do as little or as much as you require – and whether it's the full job or just one part, you'll still receive the same great service.

- Design – CAD/3D Revit MEP Modelling capabilities
- Project management
- Manufacturing and fabrication – duct work, sheet metal
- Installation
- Service and maintenance

When you engage Air Dynamics, you engage a qualified team of experts:

- △ CAD operators
- △ Light metal fabrication specialists
- △ Certified Pipe Fitter/Welders (steel and Fusiotherm)
- △ HVAC specialists

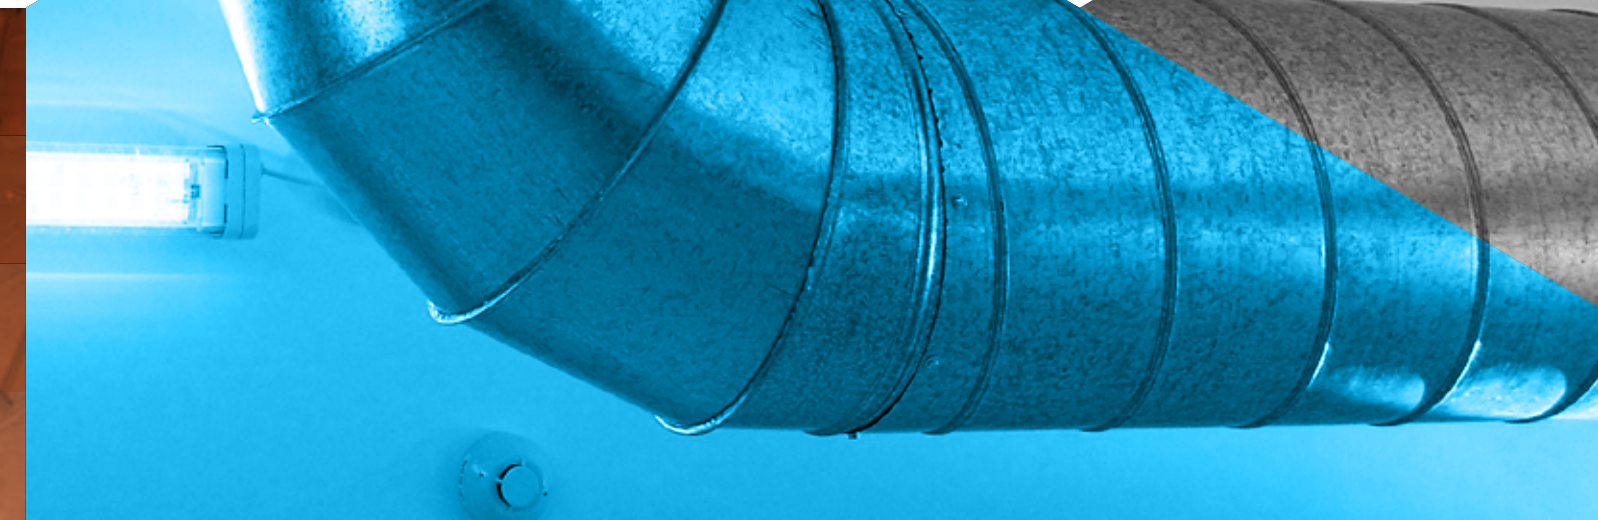

We will keep you up and running

Having the best equipment and systems to suit your needs is one part of the equation. Keeping them in good working order through regular maintenance is the other. Scheduled regular maintenance inspections will protect your upfront investment and help you reduce the risk, cost and inconvenience of breakdowns.

Our trained staff can carry out regular checks on your equipment at an interval of your choosing – monthly, quarterly, six monthly or annual. If we identify any work that needs doing, we'll produce a written and costed report for you to consider.

We offer design solutions

from small light commercial to large HVAC systems. We also have a full Sheet Metal Facility including CNC Plasma Cutting.

Manufacturing made easy

Metal dynamics is our manufacturing operation. We specialise in sheet metal fabrication, light engineering, stainless steel kitchen hoods and galvanised ducting. But the possibilities are limitless. Any type of metal - stainless steel, mild steel, aluminium, galvanised, powder coated, painted; any type of welding - MIG, TIG, Stick and Flux-Cored. Whatever sheet metal product you're seeking, we can find a way to manufacture it.

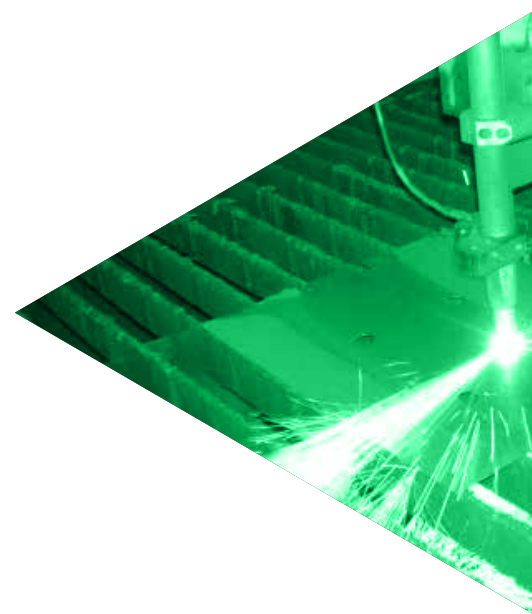

Our expert mechanical engineering team ensures all our work is produced efficiently, to the highest quality finish.

Here's just a sample of our extensive manufacturing:

- Plumbing items
- Rain water header boxes
- Waste angle
- Chimney flue
- Gas flue accessories
- Chimney caps
- Commercial dryer flues
- Shower plates
- Shower thresholds
- Flashing - COLORSTEEL, stainless steel
- Commercial kitchen - splashbacks, extract hoods, bench tops, shelving

We fulfill orders
All while we're
exceeding
expectations.
